EDUCATION

University of Washington Bothell/Seattle Sep 2024 - Expected Mar 2028

Computer Science *Major Bachelor of Science (BS)*

Applied Mathematics Minor

GPA: 3.75

Relevant coursework: Calculus (1 2 3) • Java Programming (1 2) • Data Structures and Algos • Network Architecture • Applied Linear Algebra

WORK HISTORY

Software Developer

Mar 2025 - Sep 2026

TrickFire Robotics | *Bothell, WA*

- Developed a CO2-based life detection system in Python on Ubuntu using internal tooling, processing live sensor data received over Bluetooth, as the solo developer in a team of 8.
- Configured validation using reading differences and running averages to flag implausible data; also applied data analysis practices to ensure data we received was correct and compatibility with concurrent internal systems.
- Collaborated with product managers and designers to define project requirements and deliverables

House Cleaner

Jun 2025 - Sep 2025

Vacasa | *Bainbridge Island, WA*

- As part of a team, deep-cleaned/prepared Airbnb properties and managed inventory to meet guest standards

SKILLS

Agile Methodologies, Object-Oriented Programming, Programming Languages Uava/C/C++/C#), Git/Github, Game Design/Game Engines (Unity/Godot), Software Testing, VMs/Containers, Python, Linux/Unix, Docker, LaTeX

PROJECTS

Homelab / Self-Hosted Infrastructure

Mar 2026 - Present

- Deployed and managed a Proxmox environment hosting 4 VMs and containers using Docker and running media streaming, photo, and data storage platforms.
- Architected a self-hosted cloud infrastructure solution using Immich with automated backups and 3-2-1 redundancy.
- Achieved 6+ months of continuous uptime protecting 1 TB of data, saving $10/month vs. cloud storage subscriptions.

Global Game Jam 2026 Bitmask Carnival

Jan 2026 - Feb 2026

- Participated in the 2026 Global Game Jam with the UWB Husky Game Dev club, developing a game in Godot using GDScript.
- Built a puzzle system, combining UI elements and backend code, working directly with 1 other developer.
- Tested and debugged features with teammates and submitted a finished game to the Global Game Jam site by the 47-hour deadline with a team of 9.

Password Generator

Jan 2025 - Oct 2025

- Built a JavaScript/HTML browser extension that generates random secure 15-20 character passwords.
- Runs entirely client-side with no data stored or transmitted; tested on Chrome and Firefox.
